

MACHINES 750kg TO 30tonne

Digga manufactures 2 different ranges of auger extensions depending on the host machine size. Extensions for machines up to 8 tonne are a female to male design while our extensions for machines above 8 tonne are an ingenious telescopic design which utilise an inner and outer extension.

Features

- Variety of hub options
- Heavy duty tube with highest grade steel
- Inner slides inside the outer extension on extensions for machines above 8 tonne
- 3 connection points on the inner allows multiple extension lengths to be achieved
- The inner extension can be Easier stored for transportation by sliding it inside the outer extension
